

Pre-Installation Checklist

Room Preparation

- Remove ALL furniture from the installation area
- Clear small items (rugs, lamps, decorative pieces)
- Remove wall hangings and artwork
- Clear items from shelves, cabinets, and closets in the installation zone

Space Access

- Ensure a minimum 30-50 cm clear workspace around installation areas
- Create clear pathways for installation professionals
- Sweep or vacuum the area to remove any dirt and debris
- Remove any existing flooring materials if their removal is not included as part of your installation (as previously discussed)

Personal Considerations

- Arrange alternative living spaces if multiple rooms are being renovated
- Plan for pet and child care during installation if needed
- Keep installation area free from personal traffic

Additional Considerations

- Confirm installation date and time with your flooring specialist
- Ensure all pre-installation consultations and measurements are complete
- Have contact information for installation team readily available

Day Before Installation

- Do a final clear-out of the installation area
- Protect adjacent areas with plastic sheeting if necessary
- Prepare a comfortable waiting area or plan to be away during installation

Notes

- Installation time varies depending on area size and flooring type
- Expect some noise and minor disruption during the process
- Where glue down installation is used, you cannot walk on the floor or reinstate furniture to the area for a minimum of 24 hours after installation is complete.
